DIVISION OF
OIL, GAS & MINING

Dear Mr. Smith:

Please find attached the revised MR Form 8. I apologize for the error.

GSL will take soil samples of the borrow pit areas during April, 1983. It is our intent to do some test re-seeding this coming fall.

As you are probably aware, due to the high lake level, we are doing excessive dike maintenance. Material is being taken from the pit west of our pond system. We are raising our perimeter dikes some 3 feet to protect the pond system. Total material will depend on when and at what level the lake peaks this spring.

If further information is required, let us know.

Sincerely,

Max J. Reynolds

I hereby commit the applicant to comply with Rule M-10, "Reclamation Standards" in its entirety, as adopted by the Board of Oil, Gas and Mining on March 22, 1978.

The applicant will achieve the reclamation standards for the following categories as outlined in Rule M-10 on all areas of land affected by this mine, unless a variance is granted in writing by the Division.

<u>Rule</u>	<u>Category of Commitment</u>	<u>Variance Requested?</u>
M-10(1)	Land Use	<u>PLANT SITE AS AN INDUSTRIAL PARK</u>
M-10(2)	Public Safety and Welfare	
M-10(3)	Impoundments	<u>UTAH Wildlife Agreement</u>
M-10(4)	Slopes	
M-10(5)	Highwalls	
M-10(6)	Toxic Materials	
M-10(7)	Roads and Pads	
M-10(8)	Drainages	
M-10(9)	Structures and Equipment	
M-10(10)	Shafts and Portals	
M-10(11)	Sediment Control	
M-10(12)	Revegetation	
M-10(13)	Dams	
M-10(14)	Soils	<u>No IMPORTATION - Sparse Vegetation</u>

I believe a variance is justified on a site-specific basis for the previous subsections of Rule M-10 as indicated. A narrative statement explaining these concerns is attached.
